## PROJECTS

### **BLOG-APP**

[GitHub Link](#) || [Live URL](#)

The app is built using ReactJS and JavaScript, which are popular web development frameworks. ReactJS is a JavaScript library for building user interfaces, and it is widely used in building single-page applications.

- Users can sign up, log in, and log out using their email and password. Once authenticated, they can access the app's features
- Create, read, update, and delete blog posts: Users can create new blog posts, read existing posts, update their own posts, and delete their own posts
- Users can comment on blog posts and view comments left by other users.
- Users can search for specific blog posts or filter posts based on category, tags, or author
- The app is designed to be responsive, meaning it can adapt to different screen sizes and devices

### **FOOD DELIVERY APP**

[GitHub Link](#) || [Live URL](#)

The app is built using ReactJS, which is a popular web development framework for building single-page applications. JavaScript is also used for client-side web development, and Tailwind CSS is a utility-first CSS framework for building responsive and modern web interfaces.

- Users can sign up, log in, and log out using their email and password. Once authenticated, they can access the app's features.
- Users can browse food items and add them to their cart.
- The app is designed to be responsive, meaning it can adapt to different screen sizes and devices.
- It is a useful tool for people who want to order food online and for restaurants who want to expand their reach and increase their revenue.

### **NIKE E-commerce**

[GitHub Link](#) || [Live URL](#)

A Nike e-commerce page is a web application that allows users to browse, search and purchase Nike products online. The e-commerce page is built using web development technologies such as React js, Tailwind CSS, and JavaScript.

- Users can view a list of Nike products with product images, descriptions, prices, and reviews.
- Users can add products to their shopping cart, update their cart, and checkout.
- The e-commerce page is designed to be responsive, meaning it can adapt to different screen sizes and devices.
- Admin can manage the products, view the orders and transactions.
